Built with the Mission in Mind

In use by the Israel Defense Forces (IDF), every component of this powerful platform, including a specially manufactured crew cabin, engine, fuel & oil tanks, hydraulic and electrical systems, is sheathed in customer-defined ballistic armor.

Features and Equipment

Standard configuration includes weapon mounts, storage compartments, spot light and projector lamps, and communication equipment. Optional equipment includes smoke grenade launchers, and provisioning for customer-specific communication equipment.

Maximum Protection, Practicality, and Ergonomics

The crew cabin accommodates a driver and commander, and comes equipped with communications, fire-suppression and personal weapon retention systems. Ergonomically positioned armored glass in the crew cabin provides maximum ballistic protection with high visibility, allowing views of all vehicle components in all directions. Providing ballistic protection to customer-defined threat levels, this proven Armored Caterpillar D9 configuration has earned high marks for dependability, ease-of-use, and above all - crew protection.
